SECTION 2 INSTRUCTIONS TO BIDDERS (ITB)

A. GENERAL

PROJECT OBJECTIVE AND KEY COMPONENTS

Transforming roads into Smart Roads has been conceptualized by the under Smart City Mission and by JSCL, to create 21st century public realm infrastructure for all strata of the society. This entails comprehensive upgrading of the public Right of Way (ROW) of the streets which includes (but is not limited to) – refurbishment of existing carriageway, laying of new footpaths and cycle tracks, shifting of select utilities from its current location to new location (under footpaths) or construction of new utilities, external development works for landscape, hardscape, street furniture, lighting etc.

Smart Roads include **Four Broad Objectives**, namely:

- **ROAD DIET & SAFE STREETS:** Also known as lane-width reduction or road re-channelization is a technique in transportation planning whereby the effective width of the carriageway is reduced in order to achieve systemic improvements. Roads with clearly demarcated spaces for vehicles, pedestrians, cyclists and dedicated on-street parking to minimize conflicts between vehicular and pedestrian traffic. Safe streets with shaded walkways promoting walking as a daily activity – encouraging healthy lifestyles.
- **RESILIENT STREETS:** Streets with defined utility corridor including undergrounding & overhead utilities where upgraded utilities can withstand severe natural and man-made disasters. Streets that provide infrastructure allowing safe walking experience in night through pedestrian lighting and clean public space through dustbins at regular intervals.
- **INCLUSIVE STREETS:** Streets that allow and provide multiple mobility options to its citizens including walking, cycling, driving private vehicles and commuting through public transport. Universal accessible design that allow safe walking experience to all citizens especially elderly and people with special needs.
- **STREETS AS PUBLIC SPACES:** Streets that provide spaces outside our homes for social, cultural or intellectual interactions, to walk or to just breathe fresh air. Streets that reduces congestion through replacement of encroachments on streets to its designated areas and achieving low carbon emission.

1. SCOPE OF BID

The roads are to be constructed as per the street design attached in this document following the street design guidelines such as IRC, UTTIPEC street design guidelines, etc. issued by

MoUD GoI. The attached road design considers the following three levels of transport (i) Pedestrian (ii) Cycle track (iii) Public transport users and lastly the motorized vehicles. It should include the necessary infrastructures/amenities like landscaping, water supply, storm water drainage, underground utility duct etc.

Dedicated corridors will be provided in traffic services like cycle track and pedestrian track. The scope of project is to re-construct the existing road as per the latest guidelines, rules, and regulations. The roads construction should include construction of junction, pedestrian track, cycle lane as per the design. The construction of roads must have be considered for complete modification/up gradation of the roads with utility ducts to underground electrification work and OFCs cables. The existing pedestrian track has to be upgraded and construction of non-motorized cycle lanes of world class standard meeting all the national as well as local guidelines/standards.

18 M WIDE ROAD

- Existing Roads are either concrete or bituminous roads with lesser carriageway width. It is proposed to have (7) m wide carriageway of cement concrete with provision of widening with overlay on existing surface.
- Un-segregated Cycle track on both side of carriageway will be of bituminous material which is to be highlighted with road markings as per the street guidelines.
- Pedestrian path on both side of cycle track which will be constructed with flag stone.
- Landscaping with benches, tree guards, dustbins etc. is also proposed. There is also provision of Water ATMs along some roads.
- Underground utilities such as pipe line, sewer pipeline, OFC cables, Electrical cables, rainwater drain etc. The cost of sewer pipeline and water supply is not included in this project, as they are either being executed on other project or will be executed in different projects.

24 M WIDE ROAD

- Existing roads are either concrete or bituminous roads and it is proposed to have carriageway of cement concrete with provision of widening with overlay on existing surface with or without scarifying the existing B.T. surface (as per attached road sections).
- Segregated cycle tracks on both side of carriageway will be of cement concrete material which is to be highlighted with road markings as per the street guidelines.
- Pedestrian path on both side of cycle track which will be constructed with flag stone.
- Landscaping with 3 seat chairs, tree guards, dustbins etc. There is also provision of Water ATMs along some roads.
- Median is proposed on the road.
- Underground utilities such as pipe line, sewer pipeline, OFC cables, Electrical cables, rainwater drain etc. The cost of sewer pipeline and water supply is not included in this project, as they are either being executed on other project or will be executed in different projects.

KEY TASKS/ DELIVERABLES BY THE CONTRACTOR DURING GOOD FOR CONSTRUCTION STAGE WILL INCLUDE:

- This contract involves the preparation of drawings (wherever required, including submission and obtaining of all necessary approvals from the relevant authorities). The contractor shall prepare GFC for the works included in the RFP in accordance with the concept design developed by Employer.
- The contractor should submit a complete timeline for scope of work to be carried out.
- The Client Representative will supervise and monitor the progress of this phase and contractor shall provide necessary cooperation and coordination.
- Contractor shall conduct all investigations required for design and execution of project like traffic studies and road investigations , Inventory of roads, Geo-tech investigations minimum 3 m below the hard rock or as per the BIS standards and for its structural stability and propose any new pavement, junction improvements , if required.
- Based on the revised cross section, traffic and other relevant parameters, contractor will have to design the geometry of road and pavement etc. and get it vetted and approved by 'Engineer in Charge'.
- Preparation and Submission of Complete Bill of Materials (BoM) along with detailed technical specifications, manufacturer's details and delivery schedule at the sites. Shall also provide the codification for all the items delivered.
- Preparation and submission of the details of the man power deployment for the project.
- Dispatch of materials as per the implementation accepted timelines / implementation schedule and phasing of the project by the employer.
- Preparation and submission of periodical progress report for all the stages.
- Employer will provide all the available information pertaining to these roads to the successful bidder. However contractor has to validate the information provided by carrying of field/site surveys/other relevant surveys as deemed necessary independently. The contractor shall conduct site survey and investigation of the roads where design has to be implemented and prepare survey report highlighting the site feasibility, GFC drawings, and site specific requirements / dependencies for successful implementation.
- Contractor has to prepare the documentation for showcasing the daily and weekly progress and the quantification of work done, Its mandatory to submit the progress report with Photos and Video every month and also before and after present conditions. At the end of the project a movie with 15 minutes, showcasing the project at different stages shall be submitted by the contractor.

LANDSCAPE, HARDSCAPE AND CYCLE TRACK WORKS

The various components included (but not limited to) in this are – wide footpaths, cycle tracks, landscape corridor with trees, bus bays, on-street parking, road markings, median, hawker zone, improved junctions, table tops, universal accessible design by introduction of ramps, benches and planting beds, provision for future bus stops, etc.

- Design and Construction of bus stops, public toilets and ATMs is not part of the contractor scope of work. Although the contractor is required to ensure site coordination and construction activity alignments when these works are being undertaken by other contractors.
- General Arrangement Plans (Surface Finishes Layouts) including Materials, Site
 - o Furniture, cycle tracks etc.
- Levels and Grading Layouts; Material/Lighting/Furniture Schedules; Hardscape
 - o Details (including ramps, cycle tracks, bus bays, on-street parking and benches); pedestrian lighting details; planting schedule; planting and soil details
- Hard landscape specification including all details in employers bill of quantities (BoQ) and technical specs.
- Softscape Specifications including all details in Employers BoQ and Technical Specs
- Final Setting-Out Plan for hardscape, softscape; furniture, cycle tracks, footpaths, lighting etc.
- All detail construction drawings suitable for construction works to be undertaken by competent contractor
- All necessary coordinated services drawings (including but not limited to location of light fixtures, cycle tracks, footpaths, existing site services and any new added services etc.)
- Shop drawings for all proprietary items/vendor items
- The contractor must be aware of general and specific site conditions, topography and any existing landscape prior to commencement of any landscape works on site.

B) UTILITIES - SCOPE OF INFRASTRUCTURE FOR CONTRACTOR

- Objectives for Infrastructure Layout: A sustainable approach to design and implementation of roads based on three basic principles outlined in the Tender i.e. Focus on pedestrians/cyclist movement for safety, Consistent traffic & travel lane widths and Intelligent relaying of all sub terrain utilities so as no more digging up of smart roads. Every effort to include parking spaces, street landscape, garbage pickup points, adequate lighting, clean signage's, ramped footpaths etc. in the smart streets.
- The project of Smart Roads has been considered under smart city for showcasing the pilot development to the rest of the city, which makes the area liveable and better eco-friendly environment. The scope of work for infrastructure is explained in the following section.
 - o Development and Strengthening of Carriage way with uniform lane widths. This would require removal of existing median and relocating it at a new defined road centre with street lighting and landscape elements as shown in concept drawings.
 - o Development of footpath wider and pedestrian friendly ways.
 - o Reserving the space for utilities in a specified corridor
 - o Rehabilitation of tertiary storm water road side drain for easing out of rain water with proper shoulders etc. Development of junction across entire road.
 - o Construction Bus bays, Auto bays wherever essential.

- In this project, the above said points have been considered/ incorporated for the standard development of roads. The objective of these standards is to make road for longer duration usage and to be free from zig-zag movement of vehicles, to ease out the pedestrian movement and for the safety of school children and elderly. Further, this project should ensure to avoid unnecessary road cuttings by various utility agencies.

The Employer shall notify the successful bidder by issuing a 'Letter of Acceptance' (LOA) that his bid has been accepted.

22. PERFORMANCE SECURITY

- 22.1. Prior to signing of the contract the bidder to whom LOA has been issued shall have to furnish performance security of the amount in the form and for the duration, etc. as specified in the Bid Data Sheet.
- 22.2. Additional performance security, if applicable, is mentioned in the Bid data sheet and shall be in the form and for the duration, etc. similar to Performance Security.

23. SIGNING OF CONTRACT AGREEMENT:

- 23.1. The successful bidder shall have to furnish Performance Security and Additional Performance Security, if any, and sign the contract agreement within 15 days of issue of LOA
- 23.2. The signing of contract agreement shall be reckoned as intimation to commencement of work. No separate work order shall be issued by the employer to the contractor for commencement of work.
- 23.3. In the event of failure of the successful bidder to submit Performance Security and Additional Performance Security, if any or sign the Contract Agreement, his EMD shall stand forfeited without prejudice to the right of the employer for taking any other action against the bidder.

24. CORRUPT PRACTICES:

The Employer requires that bidders observe the highest standard of ethics during the procurement and execution of contracts. In pursuance of this policy, the employer.

- i. May reject the bid for award if it determines that the bidder recommended for award has, directly or through an agent, engaged in corrupt, fraudulent, collusive, or coercive practices in competing for the Contract ; and
- ii. May debar the bidder declaring ineligible, either indefinitely or for a stated period of time, to participate in bids, if it at any time determines that the bidder has, directly or through an agent, engaged in corrupt, fraudulent, collusive, or coercive practices in competing for, or in executing , a contract.

For the purposes of this provision, the terms set forth above are defined as follows:

- a. '*Corrupt Practice*' means the offering, giving, receiving or soliciting directly or indirectly, anything of value to influence improperly the actions of another party;
- b. '*Fraudulent Practice*' means any act or omission, including a misrepresentation, that knowingly or recklessly misleads, or attempts to mislead, a party to obtain a fanatical or other benefit or to avoid an obligation:
- c. '*Coercive Practice*' means impairing of harming, or threatening to impair or harm, directly or indirectly, any party or the property of the party to influence improperly the actions of a party,
- d. '*Collusive practice*' means an arrangement between two or more parties designed to achieve an improper purpose, including influencing improperly the actions of another party.

PROCEDURE FOR PARTICIPATION IN E-TENDERING

1. REGISTRATION OF BIDDERS ON E-TENDERING SYSTEM:

All the PWD registered bidders are already registered on the new e-procurement portal <https://www.mptenders.gov.in>. The user id will be the contractor ID provided to them from MP Online. The password for the new portal has been sent to the bidders registered email ID. Helpdesk phone numbers are available on website.

2. DIGITAL CERTIFICATE:

The bids submitted online should be signed electronically with a Class III Digital Certificate to establish the identity of the bidder submitting the bid online. The bidders may obtain Class III Digital Certificate issued by an approved Certifying Authority authorized by the Controller of Certifying Authorities, Government of India. A Class III Digital Certificate is issued upon receipt of mandatory identity proofs along with an application. Only upon the receipt of the required documents, a Digital Certificate can be issued. For details please visit cca.gov.in.

NOTE:

- I. It may take upto 7 working days for issuance of Class III Digital Certificate; hence the bidders are advised to obtain the Certificate at the earliest. Those bidders who already have valid Class III Digital Certificate need not obtain another Digital Certificate for the same. The bidders may obtain more information and the Application Form required to be submitted for the issuance of Digital Certificate from cca.gov.in
- II. Bids can be submitted till bid submission end date. Bidder will require digital signature while bid submission.

The digital certificate issued to the Authorized User of a Partnership firm / Private Limited Company / Public Limited Company and used for online bidding will be considered as equivalent to a no-objection certificate / power of attorney to that user.

In case of Partnership firm, majority of the partners have to authorize a specific individual through Authority Letter signed by majority of the partners of the firm

In case of Private Limited Company, Public Limited Company, the Managing Director has to authorize a specific individual through Authority Letter. Unless the certificate is revoked, it will be assumed to represent adequate authority of the specific individual to bid on behalf of the organization for online bids as per information Technology Act 2000. This Authorized User will be required to obtain a Digital Certificate. The Digital Signature executed through the use of Digital Certificate of this Authorized User will be binding on the firm. It shall be the responsibility of Management / Partners of the concerned firm to inform the Certifying Authority, if the Authorized User changes, and apply for a fresh Digital Certificate for the new Authorized User.

3. SET UP OF BIDDER'S COMPUTER SYSTEM:

In order for a bidder to operate on the e-tendering System, the Computer System of the bidder is required to be set up for Operating System, Internet Connectivity, Utilities, Fonts, etc. The details are available at <https://www.mptenders.gov.in>

4. KEY DATES:
